Building a Strong Foundation for the Future of Florida Business

The Foundation of Associated Industries of Florida was formed in 2008 to address the educational and development needs of Florida's business community. Florida businesses cannot afford to rely on public opportunities alone to train and prepare their future employees and leaders. FAIF fosters programs that identify business needs today and creates solutions that will last into the future.

FAIF focuses on the specific issues that are important to the prosperity of Florida employers as well as educating the public at large about these issues. The Foundation targets issues that are current and are part of the ongoing discussion of how to make Florida a better place for its businesses and citizens to call home.

The support of the private business sector is critical to the success and continuance of FAIF's initiatives and programs.

We welcome your participation and suggestions as we move forward. Contributions can be made by visiting FAIF.org or by contacting our executive director, Stephen Trickey at 850.224.7173.
