Building a Strong Foundation for the Future of Florida Business

The Foundation of Associated Industries of Florida was formed in 2008 to address the educational and development needs of Florida's business community. Florida businesses cannot afford to rely on public opportunities alone to train and prepare their future employees and leaders. FAIF fosters programs that identify business needs today and creates solutions that will last into the future.

FAIF focuses on the specific issues that are important to the prosperity of Florida employers as well as educating the public at large about these issues. The Foundation targets specific issues that are current and are part of the ongoing discussion of how to make Florida a better place for its businesses and citizens to call home.

The support of the private business sector is critical to the success and continuance of FAIF's initiatives and programs.

We welcome your participation and suggestions as we move forward. Contributions can be made by visiting FAIF.org or by contacting our executive director, Stephen Trickey at 850.224.7173.

FAIF is recognized as a 501(c)(3) public charitable foundation to which tax-deductible contributions may be made, as provided by law. FAIF is governed by an independent board of directors. FAIF does not engage in any political activities.

Today's career pathways, tomorrow's workforce

LEGISLATIVE PROPOSALS

EDUCATION

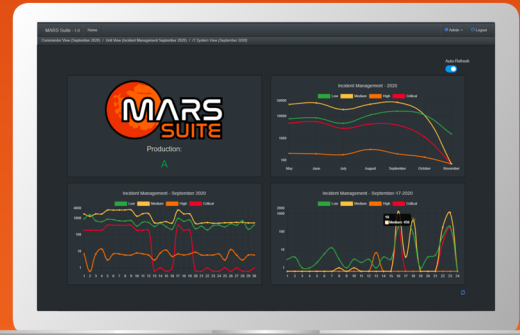

WORKFORCE DEVELOPMENT

Key Innovative Solutions connects industry and education together to effectively and efficiently design and enhance career pathways leading to a skilled workforce. With over 20 years of experience within education and industry, Key is adept in removing potential obstacles that prohibit a robust work-based learning environment. As technology changes the mode of operations quickly within each and every industry, it is critical to have a pipeline nimble enough to meet those changes for a workforce skilled to meet the current needs within industry. Through industry sector partnerships, industry and education, together, design effective career pathways for today's students, tomorrow's workforce.

IS YOUR BUSINESS READY FOR CYBER THREATS?

To meet the Department of Defense's Cybersecurity Maturity Model Certification (CMMC) levels, vendors need to increase their cybersecurity detection. Built to detect adaptive threat actors from going after the DoD's supply chain, BluVector ATD™ can help your company meet CMMC requirements and increase your potential for future opportunities.
